The Headlands is the result of a collaboration between Don Campau and Jack Hertz created for the Time Drone radio show artists drones project. The music was originally broadcast as two live shows with Hawk Hill played on August 17, 2011 and and second show following in October , 2011. These tracks pay homage to the Marin Headlands. A vast geographic region just beyond San Francisco, Ca. that are home to a maze of dark and foreboding mountains and beaches. Being residents of the Northern California Coast, The Headlands pays homage to the vast region just outside San Francisco where the Pacific Ocean encounters the land in a plethora of ways that journey between environments that are welcoming and foreboding. Epic beauty belies dark and dangerous places.
