Today it's time to drones.

Flying drones allow a person to see incredible things with a small height and distance ... recently emerged "drones" musical instruments.

This is a software based modules with little intellect, helps hear in simple guitar sound, unusual crystals.

This recording was made 4, 5, 6, 7 January - four day mission in the new reality.

A guitar is tuned to 432 hertz.

This 432 hertz is most suitable for the description of nature in different seasons.

I found this ancient setting instruments in the music of Vivaldi.

I also added a bit of the processed field recordings, supported the general mood.
