"Gods of Mars" is the latest work of Nebula VII and also second release in this netlabel. A band of drone ambient and space ambient, with a sound ethereal and deep, a sound mysterious with a texture focused toward darkness in a vacuum, cold and desolate. An Ep consisting of 5 tracks, showing an environment desolate and cold, scenarios outside of the space, as well as a good interpretation of the sounds from outside. A captivating sound but in turn introspective, an atmosphere created by the music of space ambient with dark ambient with touches of drone, developing a strong structure, giving absolute power to the adjacent programmings. A sequence notorious and authentic, while the solemn voice trapping the particles of dust that would shape the planet, before the dawn of the stars. Nebula VII and Gods of Mars a transmission protocol from outside the space.
